Engine Cleaner & Power Restorer on display

At this year's EventCity MECHANEX, Revive will be showcasing its Engine Cleaner & Power Restorer, more commonly known as Revive Turbo Cleaner.

Now developed for automotive engines, the product was originally used for the cleaning and maintenance of aviation jet engines, power station turbines and large marine diesel engines. The safe water-based, non-toxic and non-flammable fluid is sprayed into the vehicle's intake system before the

turbo inlet, whilst the engine is running. As the fluid passes through the engine system, it locks on to built-up oily/carbon deposits and strips away a surface layer. These tiny carbonised particles are no larger than the soot particles the engine naturally generates, making it a perfectly safe process for vehicles fitted with a Diesel Particulate Filter, according to the company.

“As the fluid passes through the engine system, it locks on to built-up oily/carbon deposits and strips away a surface layer.”

■ STAND NUMBER: **B40**

Carbon Clean, a brand of V-Tech, will be at Mechanex for the second year, displaying the CC-16 engine Carbon Clean System, which runs on just electricity and water. The Ox-Hydrogen system strips engine carbon deposits in a profitable

and environmentally-friendly 30 minute treatment. It is said to be equally effective on both petrol and diesel engines and operates with no added chemicals. The Carbon Clean is suitable for mobile technicians and garage-based businesses.

“The Ox-Hydrogen system strips engine carbon deposits in a profitable and environmentally-friendly 30 minute treatment.”

■ COMPANY: **SKF**
■ STAND NUMBER: **B110**

Over on the SKF stand, visitors can see the company's latest product releases in the form of wheel bearing kits, timing belt kits and suspension kits. An enhanced range of Multi-V kits, along with exact length accessory drive belts will also be available. With a growing range

throughout 2017, SKF now offers an even more comprehensive range of timing chain kits, covering the core European and Asian car models. Each kit contains all the necessary guides and sprockets, as well as tensioners, gaskets and seals where required.
